GLOBAL OUTREACH

UNITED STATES INITIATIVES

ACT TO IMPACT

\$ 100/year
allows one child from an immigrant or refugee background to acquire the academic, social, and language immersion they desperately need to succeed.

AFRICAN COMMUNITY EDUCATION (ACE) PROGRAM

The ACE Program strives to bridge the achievement gap by working specifically with refugee and immigrant youth from Africa to improve academic performance, enhance personal growth and development, build community and cultural networks, and provide family support and outreach

SHGO believes that community development is self-reflective, and truly starts at home. From SHGO's offi base in Worcester, Massachusetts, USA, the local needs look diffrent than those of SHGO's international partners – but are certainly just as critical.

SHGO is committed to partnering with local nonprofi and non-governmental organizations to support education, health, basic needs, and more – with a particular interest in collaborations with organizations and individuals that work locally, but strive for global impact. This includes important partnerships with higher education institutions to advance international development theory, practice, technical solutions, and experiential learning. Through US-based partnership development, SHGO strives to connect local allies aligned to do good and change the world.

SHGO is grateful for our USA partnerships!
